

# Determining Your Version of PowerTech Products

To determine the version of a PowerTech product you are using, locate the product and follow the instructions. If you have any questions, please call PowerTech Technical Support.

## Authority Broker

1. Enter the following command from a command line: LWRKAUTBKR
2. From the menu that displays, select option 5, Configuration Menu.
3. From the menu that displays, select option 21, Product Version Information.

## Compliance Monitor

The Compliance Monitor has three components. To determine the level of an individual component, locate it below and follow the instructions.

### Consolidator

Enter the following command from a command line to display the version:  
PTCMT2/PTPRDVRM 1PLCMT2

### Endpoint

Enter the following command from a command line to display the version:  
PTCMT3/PTPRDVRM 1PLCMT3

### GUI Console

1. From the main menu, select Help - About PowerTech Compliance Monitor.
2. Click Feature Details to view the version information.

## Network Security

1. Enter the following command from a command line: WRKPTNS
2. From the menu that displays, select option 81, Administration Menu.
3. From the menu that displays, select option 5, Product Version Information.

## Interact

1. Enter the following command from a command line: DSPLIB PTINTERACT
2. Verify whether the library PTINTERACT exists. If it does, you are using Interact 3.0.0. Otherwise, you are on a lower level.
